

# PERENNIAL SALVIA

Salvia is a butterfly attractant that can be used all year long. They prefer partial sun and can grow to 18"-36". They are heat and drought tolerant and are an easy plant to grow.

• Mystic Spires

Light

Partial  
sun

Water

Drained  
soil

Height

18" - 36"

• Mystic Spires

• Moonlight Candle

( *Pentas Lanceolata* )

# PENTAS

Pentas prefer full sun and to be very well watered. Butterfly and hummingbirds are attracted to this plant. They grow to be about 18"-24".

• Butterfly Deep Pink

• Butterfly Red

• Butterfly White

• Northern Lights

• Monarch Violet

# PENTAS - COMPACT

Known as the dwarf series, these smaller pentas are ideal as a 4.5" plant. They grow to typically 12"-15" but have the same colors and butterfly attractant qualities.

• Bright Red

• Orchid

• Lavender

• Lipstick

• Pink

• Red Lace

• Rose

• White

( Portulaca Oleracea )

# PURSLANE

This plant has bright blooms and spreads well. It tolerates almost any soil condition as long as it has good drainage. Extremely drought tolerant. It is also photosensitive so on cloudy days the blooms only partially open.

• Happy Hour Mix

Light

Full  
sun

Drained  
soil

Height

12" - 15"

• Samba Rose

• Samba White

# PURSLANE CUPCAKE

• Carrot

• Grape

• Yellow

• Cherry

( Catharanthus Roseus )

# VINCA

• Cora Apricot

• Cora Red

• White Queen

• Cora Punch

• Violet

• Cora Strawberry

- Cora Deep Lavender

- Cora Pink

Prefers full sun to partial shade. Adapts well to dry conditions and sandy soils. Very tolerant of high temperatures and reaches to be 10" - 12".

# BROMELIAD

Bromeliads provide a unique tropical flair to any environment. Bromeliads boast countless varieties, some can handle full sun, others almost full shade. Certain varieties provide a desirable flower stalk such as Blue Tango, however most bromeliads will only flower once in their lifetime. Bromeliads will reproduce by sending off smaller "pups" from its base.

• Blue Tango

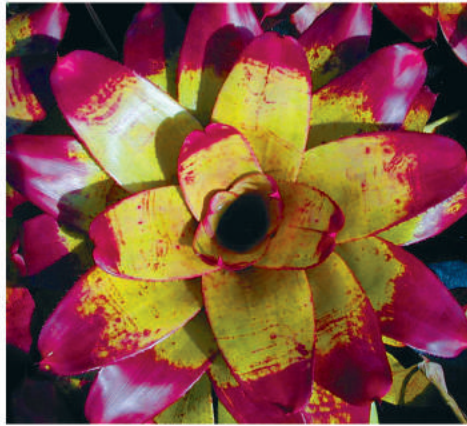

• Imperialis

# BROMELIAD - NEOREGELIA

• Neoregelia Cookie

• Tossed Salad

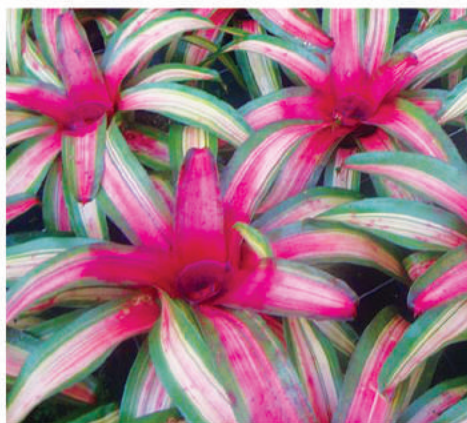

• Romance

• Malbec

• Margaret

• Tres Colores

• Bromeliad Pup

( Gamolepis Chrysanthemoides)

# BUSH DAISY

The bush daisy is ideal for mass plantings, mixed flower borders, and as a container plant. Bright yellow flowers appear in great numbers all throughout the season and are quite striking against the delicate, dark green foliage. They can grow in most soils and prefer full sun. Moderately drought tolerant.

# BUTTERFLY ATTRACTANTS

• Blue Porterweed

• Echinacea

• Pink Gaura

• Bi Color Gallardia

• Ruby Glow Pentas

• Orange Gallardia

• Butterfly Pentas

• Milkweed

• New Gold Lantana

# ENGLISH GARDENS

# NOTEWORTHY

These noteworthy plants have been successfully tested and can be used in several different combinations or on their own as a mass planting.

• Blue My Mind  
Evolvulus

• Dichondra

• Setcreasea Purple  
Queen

• Lavendula

• Plumbago White

• Plumbago Blue
